Professional Summary

Dedicated software professional with expertise in ReactJS, Java, Spring Boot, MySQL, SWODL scripting, Testing, and Jenkins. Skilled in frontend development, API integration, responsive UI design, workflow automation, and application support. Strong background in building scalable solutions and improving application performance.

TECHNICAL SKILLS

- **Languages:** JavaScript, Python, Java
- **Frontend:** ReactJS, HTML, CSS
- **Backend / Frameworks:** Flask, Python
- **Database:** SQL
- **Tools:** Git, GitHub

PROFESSIONAL DEVELOPMENT

Python & Flask – Upskilling

- Upskilled in Python programming, OOP concepts, functions, collections, exception handling and problem-solving.
- Learned Flask fundamentals and basic backend application development.
- Practiced Python programs and concepts through hands-on exercises.
- Developed and maintained Python practice projects on GitHub.

Professional Experience

Celstream Technologies – Software Engineer

August 2022 – September 2024

Developed dynamic and responsive user interfaces using ReactJS.

Built reusable components to improve maintainability and scalability.

Integrated frontend components with backend REST APIs for seamless data flow.

Enhanced UI performance and resolved critical bugs to improve user experience.

Designed and maintained SWODL scripts for AVID projects, automating workflows and reducing manual effort.

Conducted rigorous testing to ensure application quality and reliability.

Created Jenkins packages for automated deployment pipelines and assisted in build/release management.

Java Internship

Doodleblue

January 2022 – June 2022

Built Java applications using Core Java concepts and Spring Boot framework.

Designed REST APIs for modular application development.

Managed data with MySQL and optimized queries for performance.

Participated in debugging and testing to ensure robust application delivery.

Projects

Asian Paints Sleek (Java Project)

Designed and implemented RESTful APIs using Spring Boot and JPA Repository.

Utilized MySQL for efficient data storage and management.

Developed endpoints for CRUD operations covering product, order, and customer modules.

Optimized database queries to improve application performance and scalability.

Delivered a solution that streamlined order management and improved customer handling.

Buckman (ReactJS Project)

Built responsive and interactive user interfaces using ReactJS.

Developed reusable React components to accelerate development cycles.

Integrated frontend with REST APIs to ensure smooth communication with backend services.

Enhanced application features and resolved bugs, improving overall usability.

Contributed to a scalable architecture that supported long-term project growth.

AVID Projects (SWODL Scripting)

Wrote and maintained custom SWODL scripts to automate workflows.

Reduced manual intervention by automating repetitive tasks.

Improved operational efficiency and supported application enhancements.

Delivered scripts that minimized errors and accelerated project timelines.
